

Pranish Chaulagain

[LinkedIn ↗](#) | [Github ↗](#) | +977 9748285043 | itismepranish@gmail.com ↗ | Kathmandu, Nepal

Career Objective

Software engineer with experience across the TypeScript and C# ecosystems. Focused on clean architecture, system optimizations, and currently deepening knowledge in system design and distributed systems principles.

Educational Background

BSc (Hons) in Computing ↗

2023 – 2026 (Expected Graduation: August 2026)

Islington College, London Metropolitan University

Relevant Courseworks: | Software Engineering | Advanced Programming (Java) | Application Development (C#) | Advanced Database (Oracle) | Hardware and Software Architecture | Logic and Problem Solving | Cloud Computing and IoT | Artificial Intelligence |

+2 in Management with Computer Science ↗

2021 - 2023

Kathmandu Model College, National Examination Board

Work Experience

Frontend Developer (Intern → Developer) [Resto Brain.ai](#) ↗

September 2025 - Present

- Developed and maintained scalable and reusable UI architecture with **React + TypeScript** components for a data-driven dashboard for improving efficiency of client's business workflows.
- Eliminated redundant API calls across the dashboard using **TanStack Query caching**.
- Built robust forms with **React Hook Form + Zod**, enforcing validation before sending data to the API
- Collaborated with backend team to refine API contracts. improving frontend-backend integration.
- Wrote **Component** and **E2E tests** using **Cypress**, covering UI components and dashboard workflows.

Technical Skills

Languages: TypeScript, Python, C#, Java

Databases: PostgreSQL, MySQL, MongoDB

Frontend: React, Next.js, Blazor, Tanstack Start

Cloud and Tools: Cypress, Vercel, Cloudflare, Google

Backend: Node.js, ASP.NET, FastAPI, Java Servlets

Cloud Run, AWS, Docker

Currently Exploring: System Design, Go, TUIs

Personal Projects

TapWholeSale AI Nepal → [Next.js](#), [FastAPI](#), [Vercel](#), [Google Cloud Run](#), [Supabase](#) ↗

- Built and deployed a wholesale e-commerce PWA for Nepali apparel businesses using **Next.js** and **FastAPI**.
- Implemented **Supabase RLS** policies and **RPC queries** for secure and efficient data storage and access.
- Built personalized recommendation system through **TF-IDF + SVD** for improving user engagement and UX.
- Built a sales forecasting pipeline with **LightGBM**, enabling data-driven decisions for the admin wholesaler.
- Achieved Lighthouse scores of **90+** through **SSR**, **PPR**, and **RSC**, reducing load times and improving web vitals.

Quizex - Quiz Management Application → [MERN Stack](#) ↗

- Developed a quiz platform with **MERN** stack for classroom based quiz tests and workflows.
- Implemented secure authentication through **refresh token rotation**, reducing security risks.
- Implemented controlled access through **RBAC** enabling admin-only actions.

Custom Home Page (Chrome) → [React](#), [Tailwind CSS](#) ↗

- Developed a customizable homepage UI with **React**, **Tailwind CSS** for improving personal productivity.
- Implemented persistent shortcuts, through **localStorage**, enabling personalized user control.
- Integrated personalized widgets (weather, time, search bar) for enhanced personal productivity.

Academic Projects

Nep-Auto - Vehicle Rental and Parts Supplier System → [C# ASP.NET, Tanstack Start, PostgreSQL](#) ↗

- Built a full-stack Inventory Management System using **ASP.NET** and **PostgreSQL**.
- Integrated secure auth through **Http-only cookie based JWT + RBAC** reducing vulnerabilities.
- Structured the application using **Layered (N-Tier) Architecture** with Controllers, Services, and DTOs for clean separation of concerns.
- Used **Entity Framework Core** and **Dependency Injection** with interface-based design for scalable, maintainable data access and business logic.

My Journal - Journaling App → [C#.NET MAUI Blazor Hybrid, SQLite](#) ↗

- Built cross-platform journaling application using **.NET MAUI Blazor Hybrid** running natively on all OS for enabling multi-platform usage.
- Implemented encrypted **SQLite** storage with password hashing for secure local data management.
- Integrated rich-text editing functionality using **QuillJS** for enhanced user experience.

Be Fit - Fitness Journaling Website → [JSP, Java Servlets, SQL, CSS](#) ↗

- Built a fitness tracking system using **JSP/Servlets** for user activity logging and nutrition tracking.
- Achieved secure DB operations, through **parameterized queries**, preventing SQL injection.
- Integrated **AJAX** for dynamic UI updates without full page reloads, improving user interaction flow.
- Designed session-based authentication system for secure user login and activity tracking.

Certifications

AWS Academy Graduate - Machine Learning for Natural Language Processing *AWS, 2024* ↗

AWS Academy Graduate - Data Engineering *AWS, 2024* ↗

AWS Academy Graduate - Cloud Foundations *AWS, 2024* ↗

AWS Academy Graduate - Machine Learning Foundations *AWS, 2024* ↗

FullStack Development with Javascript, React and Node.js *Islington College, 2025* ↗

Data Structures and Algorithms *Islington College, 2025* ↗
